

# Diet or Genetics?

Exploring the contributions of host evolutionary history and diet in shaping the gut microbiota of cactophilic flies

James G. DuBose<sup>1</sup>, Thomas B. Crook<sup>2</sup>, Luciano Matzkin<sup>3</sup>, Tamara S. Haselkorn<sup>2</sup>

<sup>1</sup>Emory University, <sup>2</sup>University of Central Arkansas, <sup>3</sup>University of Arizona

## Background

Both host diet and genetics can play important roles in shaping a host's gut microbial community. However, discerning
